PROFILE

Full Stack Developer with 3.9 years of experience building modern, scalable, and high-performance web applications using **React.js, Next.js, TypeScript, and Node.js**. Experienced in developing **real-time IoT monitoring dashboards, ERP systems, and responsive user interfaces** using Redux Toolkit and React Query. Strong knowledge of building **secure RESTful APIs, JWT-based authentication, and database design** using SQL and MongoDB, with additional backend experience in **ASP.NET Core**. Skilled in developing end-to-end web solutions, API integration, state management, and performance optimization.

PROFESSIONAL EXPERIENCE

Full Stack Developer 07/2026 – 09/2026 | Noida 63

Ufirm technologies pvt. ltd.

- Developed **IoT and ERP-based web applications** using React.js, TypeScript, ASP.NET Core, C#, and SQL Server.
- Built responsive **IoT dashboards** for real-time device monitoring, data visualization, and operational analytics.
- Integrated **RESTful APIs** for IoT data including flow rate, temperature, voltage, and device status.
- Developed **reusable UI components** and optimized application performance and responsiveness.
- Implemented **authentication, authorization, and role-based access control**.
- Contributed to **ERP modules** and worked in Agile development environments.
- **Project:** UFirm – ERP & IoT Platform

Front End developer May 2024 – 04/2026 | Bengaluru

Sival DevOps Software Pvt. Ltd. Bangalore Urban, Karnataka, India

- Developed and maintained scalable real estate web applications using React.js, JavaScript (ES6+), and component-based architecture
- Implemented search and filtering with React Query an debouncing, improving performance and engagement by **40%**.
- Reduced unnecessary re-renders and optimized state updates, improving UI responsiveness by 35%.
- Developed advanced property listing and property search features for buy, sell, and rent modules with optimized filtering and sorting functionality.

Key Projects:

- squarebric.com
- sivaldevops.com
